

## **New York State Offshore Wind Maritime Technical Working Group**

### **Cabling Workshop: *Advancing Cable Routing Coordination***

#### Meeting Agenda

Jay Conference Center - Midtown East  
515 Madison Ave 10th floor, New York, NY 10022  
March 2, 2023 | 9:00am - 4:30pm

#### **Meeting Purpose:**

The workshop is intended to provide many benefits, namely:

- Build upon the findings in the Cable Corridor Assessment with additional maritime and offshore wind industry viewpoints;
- Continue forward momentum of responsible offshore wind development; and
- Generate a workshop summary document that reflects the varied perspectives from affected stakeholders and identifies necessary next steps. The summary will not be a consensus document.

While the workshop has many anticipated benefits and outcomes, participants will not:

- Make decisions together (they'll be sharing their best advice and input)
- Assess specific project impacts;
- Be ranking or prioritizing potential routes, landfalls, or points of interconnection; or
- Be asked to generate consensus advice.

#### **Preparation**

In advance of this workshop, all participants should:

- Familiarize themselves with the NYSERDA Offshore Wind Cable Corridor Constraints Assessment by reviewing the document and watching the webinar that introduces the report ([public webinar recording](#))
- Prepare to answer questions posed in **Routing by Region** and **Breakouts on Key Topics**

#### **9:00 Breakfast and Arrival**

Participants arrive and visit. Coffee and pastries available.

#### **9:30 Welcome and Introductions** – Laura McLean (DOS) and Ona Ferguson (CBI)

#### **9:50 Context for today**

Presentations on next steps for New York State's offshore wind transmission planning.

Offshore Wind in NYS - *Greg Lampman, NYSEERDA*

NYS Transmission planning process - *Liz Grisaru, NYS Department of Public Service*

**10:15 Routing by Region: New York Harbor - All**

How do we route the cables into NY Harbor with (a) as little impact as possible on existing maritime traffic, and (b) without introducing new hazards? What mitigation measures will be helpful?

**11:30 Brief Report out - share 2 concepts per group**

**11:45 Lunch** (provided)

**12:30 Routing by Region: Long Island Sound and East River - All**

How do we route the cables into Long Island Sound with (a) as little impact as possible on existing maritime traffic, and (b) without introducing new hazards? What mitigation measures will be helpful?

**1:30 Break** (snack provided)

**1:45 Full Group Discussion on Routing**

Sharing reflections on small group discussions, what did you hear? What was new and promising?

**2:15 Breakouts on Key Topics**

Participants will get to participate in up to 2 of 3 breakout topics.

Breakout session topics and discussion prompts:

- Maritime outreach & coordination:
  - What if any changes are needed to improve coordination between the maritime sector and offshore wind developers?
  - What types of outreach should be standard on all offshore wind projects?
- Information Needs & Technology:
  - What information or technologies might help us overcome challenges discussed today?
  - What data gaps create challenges for maritime/offshore wind industries?
  - What baseline studies are most important to plan an offshore wind project's cable route?

- Policy & Procedures:
  - What considerations should be prioritized for coordinated offshore wind transmission?
  - Should there be any additions or changes to the Constraints (Tables 2-4 and 2-5) or Siting Principles (Section 4.1) identified in the Cable Assessment?

**3:30 Open Discussion and Next Steps**

Large group discussion - what else is important to share today? What is most exciting or promising? What really needs more discussion?

**4:30 Adjourn**
